

# GIE User Manual

## Introduction

GIE is a simple and powerful tool to encrypt and decrypt your files and folders.

## How to Use

### Encrypting a File or Folder

1. **Select a file or folder:**
  - Drag and drop a file or folder into the application window.
  - Or, click the “Add File” or “Add Directory” button to select a file or folder.
2. **Enter a password:**
  - Type a strong password in the password field.
3. **Add a hint (optional):**
  - You can add a hint to help you remember the password.
4. **Click “Encrypt”:**
  - The application will create an encrypted file with the `.gie` extension.

### Decrypting a File or Folder

1. **Select a `.gie` file:**
  - Drag and drop a `.gie` file into the application window.
  - Or, click the “Add File” button to select a `.gie` file.
2. **Enter the password:**
  - Type the correct password in the password field.
3. **Click “Decrypt”:**
  - The application will decrypt the file or folder and save it in the same directory.

## Advanced Options

You can access advanced options by clicking “Show Advanced Options”.

- **Encryption Level:** Choose between Low, Normal, and High encryption levels.
- **Channel:** Set a custom channel for encryption and decryption.
